TOPICS COVERED

- Proposal & Award Policy & Procedures Guide (PAPPG) Status Update
- NSF and SciENcv
- Proposal Submission in Research.gov
PAPPG IMPLEMENTATION SCHEDULE

- Spring 2019 – Federal Register for public comment
- Comments Were Submitted by July 29, 2019 in Response to Proposed Changes
- PAPPG is typically posted in October, with an implementation date in January
NSF received 105 comments in response to the draft PAPPG; approximately one-third of these comments related to coverage on Current and Pending Support (C&PS)

An internal working group was formed to consider the feedback provided as well as to develop proposed responses. Each comment is being thoughtfully and thoroughly considered.

Based on the input, there will definitely be implications for the C&PS coverage in the PAPPG.

The recommended responses to the comments and the revised draft PAPPG have not yet been provided to senior management for their consideration.

This means that there will not be an October 2019 posting of the PAPPG on the NSF website, and, there will not be a January 2020 PAPPG effective date.

The actual posting date and implementation date remain TBD.
In the draft PAPPG, NSF announced that it will only accept PDFs for the Biographical Sketch and Current and Pending Support that are generated through use of an NSF-approved format.

NSF announced at the last FDP meeting that SciENcv was selected as an NSF-approved format and encouraged faculty to begin using the NSF template in SciENcv.

NSF has been working with NIH to ensure that the NSF template in SciENcv meets all NSF formatting and content requirements.

NSF also is collaborating with NIH to develop a template for use in submission of Current and Pending Support information.
